Configuring Bugsnag

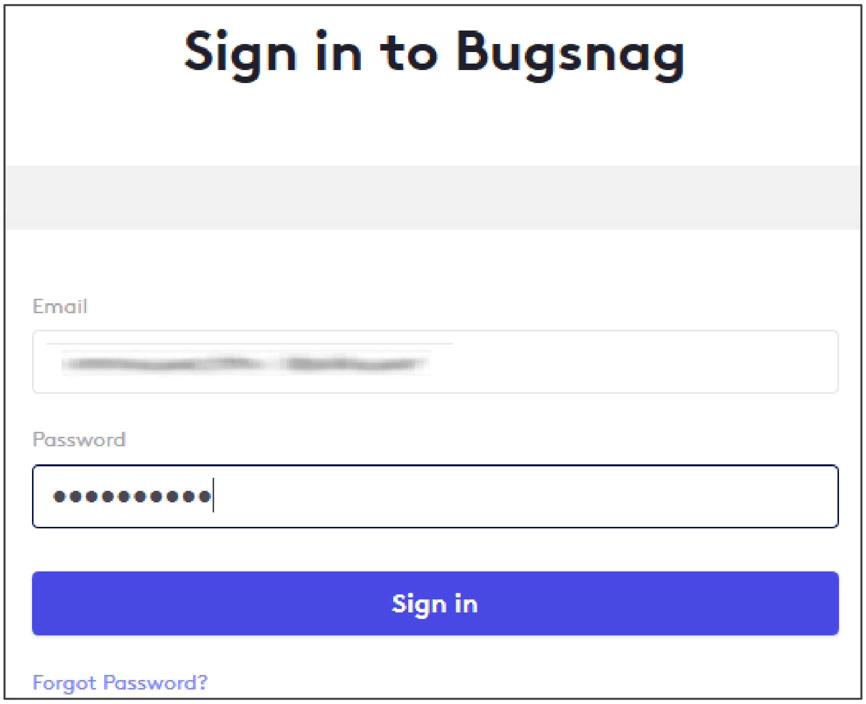
Configuring Bugsnag for single sign-on (SSO) enables administrators to manage users of Citrix ADC. Users can securely log on to Bugsnag by using the enterprise credentials.

Prerequisite

Browser Requirements: Internet Explorer 11 and above

To configure Bugsnag for SSO by using SAML:

1. In a browser, type https://www.bugsnag.com/ and press **Enter**.
2. Type your Bugsnag admin account credentials (**Email** and **Password**) and click **Sign in**.



Sign in to Bugsnag

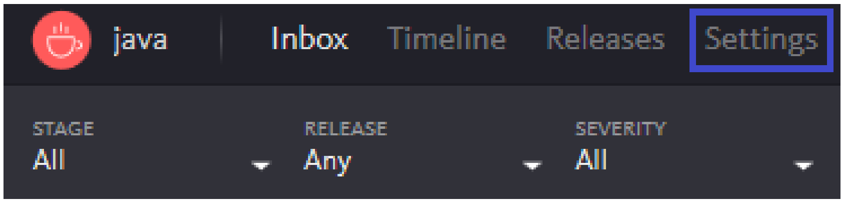
Email

[redacted]

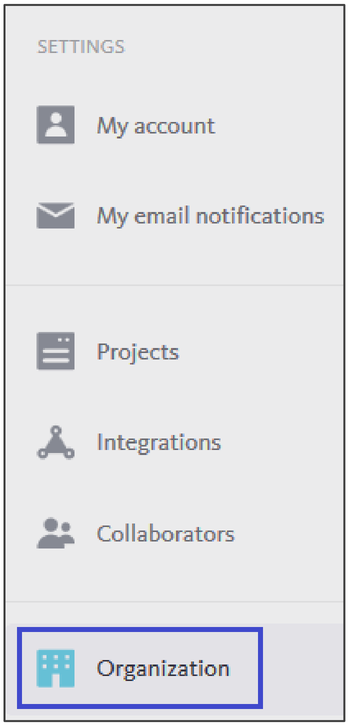
Password

●●●●●●●●●●●

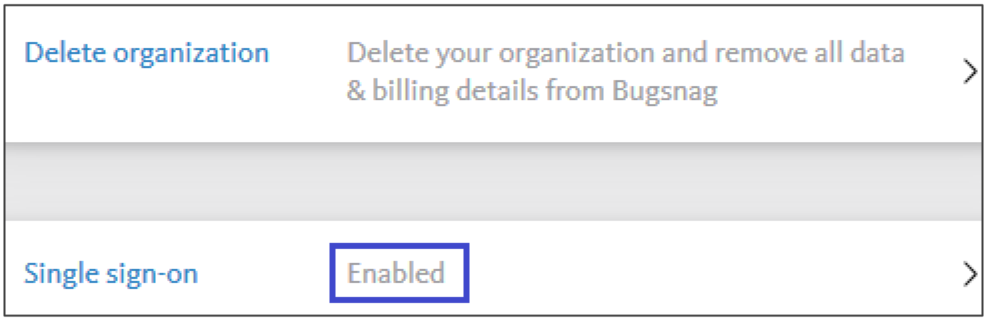
3. Click **Settings** present in the navigation bar of the dashboard.



4. In the left panel, select **Organization**.



5. In the **Authentication** section, click **Single sign-on** to change the setting to **Enabled**. This will update the SSO provider settings.



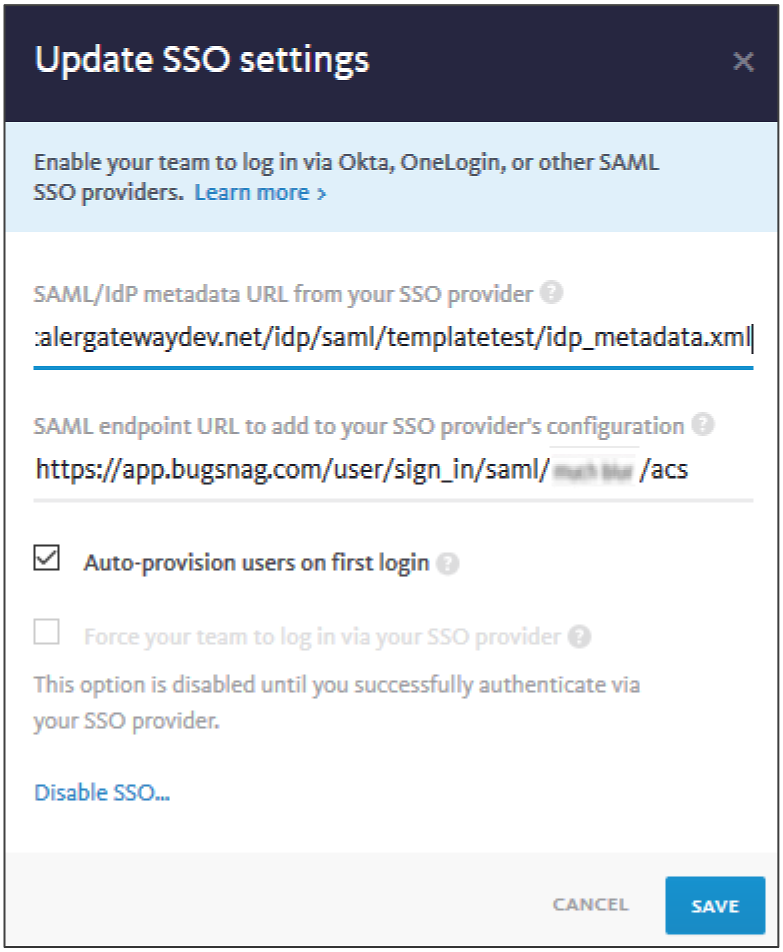
Delete organization — Delete your organization and remove all data & billing details from Bugsnag

Single sign-on — Enabled

Note: Contact the support team if **Single sign-on** tab is not available.

6. In the **Update SSO Settings** section, enter the values for the following fields.

Field Name	Description
SAML/IdP metadata URL from your SSO provider	Paste the IdP metadata URL. **Note:** The SP metadata is provided by Citrix and can be accesses from the link below: https://ssb4.mgmt.netscalergatewaydev.net/idp/saml/templatetest/idp_metadata.xml
SAML endpoint URL to add to your SSO provider's configuration	SAML endpoint URL



Update SSO settings

Enable your team to log in via Okta, OneLogin, or other SAML SSO providers. Learn more >

SAML/IdP metadata URL from your SSO provider

:alergatewaydev.net/idp/saml/templatetest/idp_metadata.xml

SAML endpoint URL to add to your SSO provider's configuration

https://app.bugsnag.com/user/sign_in/saml/[redacted]/acs

☑ Auto-provision users on first login

☐ Force your team to log in via your SSO provider

This option is disabled until you successfully authenticate via your SSO provider.

Disable SSO...

7. Finally, click **Save**.
